## 1. CONCEPT

This term our objective is to create a themed Trivia Quiz Application that allows the users to answer multiple questions and receive scores. This application should be created through the use of Kotlin, GitHub, Android Studio and Scope Manage Control.

My concept for this application is a movie trivia quiz named, Films.Ly, that asks questions about famous quotes from films, people/ actors and directors and writers of these films or the novels on which these films are based on. The style I will try to achieve in this project is a fun playful environment with illustrations, cartoons and dark playful colours, i. e. Purple, orange, pink.

## 2. CATEGORIES AND TOPICS

### 2.1. SKETCHES AND IDEATION

Questions: Directors & Writers

1. James Wan directed which of these films in 2013?
